

10. How many right angles do you make if you start facing: a. south and turn clockwise to west?

- a. 1                                      b. 2                                      c. 3                                      d. 4

11. How many degrees are there in three-fourth of a revolution?

- a. 180                                      b. 90                                      c. 270                                      d. 360

12. How many degrees are there in four right angles?

- a. 180                                      b. 90                                      c. 270                                      d. 360

13. How many right angles make  $270^\circ$ ?

- a. 4                                      b. 3                                      c. 2                                      d. 1

14. How many right angles make  $90^\circ$ ?

- a. 1                                      b. 2                                      c. 3                                      d. 4

15. Which of the following are models for perpendicular lines?

- a. The adjacent edges of a table top.                      b. The lines of a railway track.  
c. The line segments forming the letter 'L'.                      d. The letter V.

16. An angle whose measure is the sum of the measures of two right angles is \_\_\_\_\_.

- a. Right                                      b. Reflex                                      c. Straight                                      d. Acute

17. When two lines intersect and the angle between them is a right angle, then the lines are said to be \_\_\_\_\_.

- a. Parallel                                      b. Perpendicular                                      c. Adjacent                                      d. Intersecting

18. Find the number of right angles turned through by the hour hand of a clock when it goes from 3 to 9.

- a. 3                                      b. 2                                      c. 1                                      d. 0

19. If an angle is larger than a right angle, but less than a straight angle, it is called an \_\_\_\_\_.

- a. right angle                                      b. straight angle                                      c. acute angle                                      d. obtuse angle

20. A line segment is a fixed portion of a \_\_\_\_\_.

- a. Ray                                      b. Line                                      c. Angle                                      d. Square
